

**WBS Obtains Injunction in
Non-Profit Governance Dispute**

Representing a 3,000-member National Association of Physicians, after a 3-day bench trial, **Mitch Bryan** obtained a preliminary in injunction restricting further unauthorized actions of the Association President contrary to direction of the Association's Executive Committee. Driving this decision was the court's underlying ruling that the Executive Committee constituted the Association's statutory Board of Directors, which was not otherwise established by the Association's corporate charter, constitution and by-laws.
